

Production Access Questionnaire

Testers Community

The objective of this report is to provide comprehensive answers that our clients can use to fill the production access form. You can use the answers directly or can make changes based on how you improved the app. After 14 days of testing, users will be prompted to fill a form on closed testing to get access to production. This document can be helpful in answering those questions.

App Name: Bolt 3 - 16 (3.0.4)

App URL:

<https://play.google.com/store/apps/details?id=com.badgr.orbreader>

Production Access Questionnaire

1) How did you recruit users for your closed test? For example, did you ask friends and family, or use a paid testing provider?

We used a paid testing provider to gather comprehensive feedback on BADGR Bolt's performance. Additionally, we reached out to our target audience of students and avid readers to obtain valuable insights from real users, enhancing the app's usability and features.

2) How easy was it to recruit testers for your app?

Answer: Easy

(You can select your own answer).

3) Describe the engagement you received from testers during your closed test

Testers actively engaged by providing constructive feedback on features, usability, and overall experience. Their input was instrumental in refining the

app, leading to crucial improvements in user navigation, interface design, and feature accessibility, significantly boosting user satisfaction.

4) Provide a summary of the feedback that you received from testers. Include how you collected the feedback.

Feedback highlighted the need for a dynamic walkthrough for new users, improved ASO optimization, enhanced screenshots reflecting key features, and a "Rate Your App" button. We collected feedback through surveys, direct communication, and usability testing sessions to ensure comprehensive insights.

5) Who is the intended audience for your app?

BADGR Bolt is tailored for students, professionals, and avid readers seeking to enhance their reading speed and comprehension. The app serves anyone looking to efficiently manage their reading materials and improve their focus using innovative RSVP technology.

6) Describe how your app provides value to the users.

BADGR Bolt empowers users to read 2x to 5x faster through its RSVP technology, allowing for deeper focus and retention. With offline support,

customizable features, and a distraction-free interface, it transforms reading into a seamless and efficient experience for all users.

7) How many installs do you expect your app to have in your first year?

Answer: 10k - 100k

(You can select your own answer).

8) What changes did you make to your app based on what you learned during your closed test?

In response to user feedback, we implemented a dynamic walkthrough for new users, optimized app description for ASO, enhanced screenshots to showcase features, and added a "Rate Your App" button, significantly improving user onboarding and engagement with the app.

9) How did you decide that your app is ready for production?

After thorough testing and integrating user feedback, we ensured BADGR Bolt is stable, user-friendly, and feature-rich. The app has undergone rigorous enhancements to address usability issues, making it optimized for a successful launch on Google Play.

10) What did you do differently this time?

This time, we prioritized user engagement by actively seeking feedback from a diverse group of testers. We focused on refining the user experience based on their insights, which led to a more polished application that meets the needs of our audience effectively.

You can use the above answers or add your personal touch to those answers to make them more natural and meaningful. Don't forget that this form plays the most important role in the entire process of getting production access. If you have any more questions, please feel free to contact us.

**Best regards,
Testers Community Team**
